

SmartHome Security

Home just got smarter

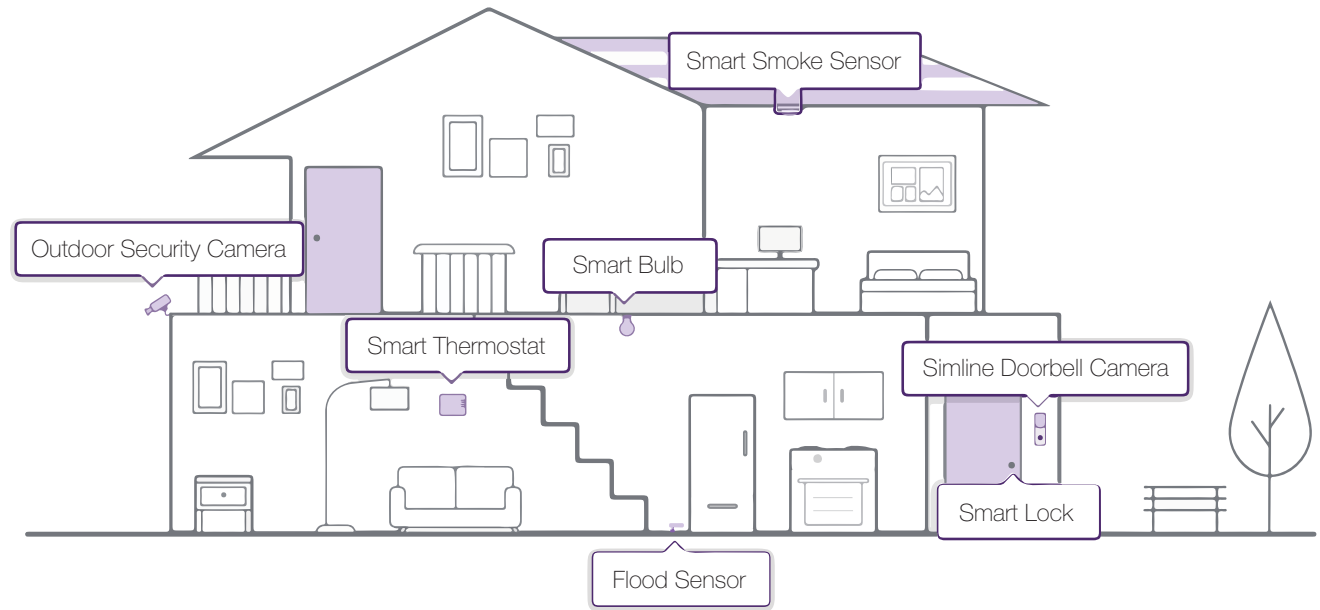

Manage your home from anywhere

Control your lights and thermostat, see who's at that door with live video, let friends and family in and more -- all from your mobile phone using the dedicated app. Now that's smart.

"All-in-one" Touchscreen Panel

Control everything from your locks, lights, doorbell, appliances, cameras, and garage door.

CO Sensor
Carbon Monoxide Detection alert via app

Smart Garage Door
Open/Close via main panel or mobile app

Smart Smoke Sensor
Wireless sensor provides remote notification

Glass Break Sensor
Monitor when glass has been shattered

HD Wireless Outdoor Security Camera
Weather-proof camera can capture live and recorded video around your home

Smart Door Lock
Grant friends & family short-term access by creating temporary codes. Limit guest access to specific dates or times when needed

Business Security

Keep your business safe

TELUS Security offers high-quality products that help monitor and protect your business, all in one easy-to-use and intuitive mobile app.

Know what's happening at your place of business and take control from your smart device.

Get notifications or access reporting if there is unexpected activity or if your employees opens late or closes early.

Other Key Features

Set rules to count and record store traffic using video analytics to better optimize work hours and reduce costs.

Manage user codes for all of your locations remotely to better control who gets access.

Bundle with cyber security solutions.

Managed Detection & Response
Detect and respond to cyber threats across your cloud and network environments.

Threat Vulnerability Assessments
Assessment and testing programs to identify security weaknesses.

Governance, Risk and Compliance (GRC)
Assess your cyber security posture and develop a sustainable security program.

Next Generation Firewall
A cloud or on-premise managed solution to protect users, applications, content.

Email Protection
Protection from advanced email threats including phishing, viruses, and malware.

Endpoint Protection
Advanced protection against sophisticated threats targeting your endpoints.
